Hi Tasha,

Thank you for joining us! As you can tell, we had some challenges with moving beyond identifying the objects in the proclamation and developing themes and ROV statements. My hope is that this provided you and Jihadda with some insight on a better process for Sand to Snow. I would love any feedback you have on that front.

I've attached the powerpoint and cc'd Tim here so that you have his email. Here is his other contact info:

Thank you again for including me today. The presentation and discussions about objects and values has been very helpful to me. I had a discussion with Tim about getting in contact after this call but I do not see his contact info on the emails. I also do not see his presentation available in order to get his card he showed. Can you send me either or both his contact info and his presentation. I would love to have that presentation for the future but if you do not have it I will ask him 😊 Thank you again for a great day! Happy monument planning 😊

Route Ahead

This webinar will cover :

- ❖ Designations
 - Monuments
 - National Conservation Areas & Similar Designations
- ❖ Resource, Objects, and Values (ROVs)
- ❖ Canyon of the Ancients Exercise
 - Proclamation
 - Legislation
- ❖ Identifying and Writing Resource, Objects, and Values
- ❖ Integrating into Resource Management Plan
- ❖ Reporting Resources, Objects, and Values

**NATIONAL
CONSERVATION
LANDS**

Designation

The Antiquities Act of 1906 grants the President authority to proclaim national monuments in order to protect “**objects** of historic or scientific interest.” President Theodore Roosevelt first used this authority to protect Devils Tower in 1906. Nearly every President since then has created national monuments.

National monuments are managed by a variety of federal agencies. What agencies you think manage national monuments?

- | | |

| <input type="checkbox"/> National Oceanic and Atmospheric Administration | <input type="checkbox"/> Internal Revenue Service |

President Theodore Roosevelt

**NATIONAL
CONSERVATION
LANDS**

Designation

National Monuments

National Monuments are federal lands designated by a presidential proclamation or an act of Congress to protect objects of historic or scientific interest associated with those lands.

Most national monuments are withdrawn from entry, location, selection, sale, leasing, or other disposition under the public land and mineral laws.

**NATIONAL
CONSERVATION
LANDS**

Designation

Until 1996, monuments designated on BLM-administered land were generally moved under the administration of the National Park Service upon designation.

President Clinton and President Obama proclaimed national monuments to be managed by the BLM.

BLM currently manages 27 National Monuments

President Obama designates two new monuments including Berryessa Snow Mountain (CA) and the Basin and Range (NV), both managed by the BLM

**NATIONAL
CONSERVATION
LANDS**

Designation

National Conservation Areas and Similar Designations

National conservation areas are federal lands designated by Congress to conserve, protect, and restore exceptional resources and values. The BLM also manages other designations--such as outstanding natural areas-- and are treated similar to national conservation areas.

All such designations are generally grouped together as conservation areas.

**NATIONAL
CONSERVATION
LANDS**

Designation

Legislation designations such as National Conservation Areas can identify a wide variety of **resources** and **values** for these areas including natural, recreational, cultural, wildlife, aquatic, archaeological, paleontological, historical, educational, and/or scientific resources for protection.

**NATIONAL
CONSERVATION
LANDS**

Designation

Legislation Designations

- ❖ BLM is the only agency managing conservation areas.
- ❖ The King Range National Conservation Area, designated in 1970, was BLM's first such designation.
- ❖ The BLM currently manages 16 national conservation areas and 5 similar designations.
- ❖ The management of each conservation area or similar designation depends on its specific enabling legislation.

**NATIONAL
CONSERVATION

Resources, Objects, and Values

What are Resources, Objects, and Values (ROVs)?

The features and elements identified in each unit's proclamation or legislation language to be conserved, protected, restored and/or enhanced

Carrizo Plain NM, CA

Headwaters Forest Reserve, CA

Basin and Range NM, NV

Prehistoric Trackways NCA, NM

McInnis Canyons NCA, CO

**NATIONAL
CONSERVATION
LANDS**

Resources, Objects, and Values

Objects:

Objects

Identified and found in presidential proclamations designating national monuments under the Antiquities Act of 1906.

The Antiquities Act requires the "proper care and management of objects" of historic and scientific interest.

**NATIONAL
CONSERVATION
LANDS**

Resources, Objects, and Values

Resources & Values:

Identified in legislation designating National Conservation Areas.

The management requirements for resources and values depend on the language in the individual Act.

National Conservation Areas each have a specific piece of legislation instead of an overarching authority such as the Antiquities Act or Wilderness Act.

LANDS**

Identifying Resources, Objects, and Values

Canyons of the Ancients National Monument, was designated on June 9, 2000 by Presidential Proclamation although it had been introduced through legislation prior.

- ❖ Review the three paragraphs of the designated proclamation noting what “Objects” are identified.

Canyons of the Ancients NM CO

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

A PROCLAMATION:

Containing the highest known density of archaeological sites in the Nation, the Canyons of the Ancients National Monument holds evidence of cultures and traditions spanning thousands of years. This area, with its intertwined natural and cultural resources, is a rugged landscape, a quality that greatly contributes to the protection of its scientific and historic objects. The monument offers an unparalleled opportunity to observe, study, and experience how cultures lived and adapted over time in the American Southwest.

The complex landscape and remarkable cultural resources of the Canyons of the Ancients National Monument have been a focal point for archaeological interest for over 125 years. Archaeological and historic objects such as cliff dwellings, villages, great kivas, shrines, sacred springs, agricultural fields, check dams, reservoirs, rock art sites, and sweat lodges are spread across the landscape. More than five thousand of these archaeologically important sites have been recorded, and thousands more await documentation and study...

More than five thousand of these **archaeologically important sites** have been recorded, and thousands more await documentation and study...

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

The monument is home to a wide variety of wildlife species, including unique herpetological resources. Crucial habitat for the Mesa Verde nightsnake, long-nosed leopard lizard, and twin-spotted spiny lizard can be found within the monument in the area north of Yellow Jacket Canyon. Peregrine falcons have been observed in the area, as have golden eagles, American kestrels, red-tailed hawks, and northern harriers. Game birds like Gambel's quail and mourning dove are found throughout the monument both in dry, upland habitats, and in lush riparian habitat along the canyon bottoms.

**NATIONAL

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

When developing a ROV statement make sure it is:

- ❖ stated or implied in the Proclamation or Legislation;
- ❖ a complete thought;
- ❖ measureable;
- ❖ identifies or describes possible trends;
- ❖ identifies or describes possible stressors.

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

What objects are identified in the proclamation? Pull terms from the list on the right and list in the **Objects** box.

Objects

- remarkable cultural resources
- agricultural fields
- recreation
- pit house dwellings
- grazing permits and leases
- wide variety of wildlife species
- geology
- peregrine falcon
- basketmakers
- oil and gas development
- Paradox Basin
- hunting and fishing
- game birds
- Mesa Verde nightsnake

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

ROV development will require the IDT team to interpret and define the “Objects” into a broader theme.

From the list of objects develop a broader theme for a ROV.

A large, empty rectangular box with a thin black border, intended for notes or a list of objects.

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

Now review the introduced, but never passed, [legislation](#) noting what “Resources and Values” are described below.

SECTION 1. SHORT TITLE.

This Act may be cited as the ‘Canyons of the Ancients National Conservation Area Act’.

SEC. 2. FINDINGS AND PURPOSE.

(a) **FINDINGS** Congress finds that certain areas located in Dolores and Montezuma Counties, Colorado

- (1) contain unique and valuable historical, cultural, scientific, archaeological, natural, and educational resources; and
- (2) should be protected and enhanced for the benefit and enjoyment of present and future generations.

(b) **PURPOSE** The purpose of this Act is to establish the Canyons of the Ancients, Colorado, as a National Conservation Area.

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

SECTION 1. SHORT TITLE.

This Act may be cited as the 'Canyons of the Ancients National Conservation Area Act'.

SEC. 2. FINDINGS AND PURPOSE.

(a) **FINDINGS** Congress finds that certain areas located in Dolores and Montezuma Counties, Colorado

(1) contain unique and valuable historical, cultural, scientific, archaeological, natural, and educational resources; and

(2) should be protected and enhanced for the benefit and enjoyment of present and future generations.

(b) **PURPOSE** The purpose of this Act is to establish the Canyons of the Ancients, Colorado, as a National Conservation Area.

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

Based on the **proposed legislation** - The unique "Resources and Values" identified where:

- ❖ historical
- ❖ cultural
- ❖ scientific
- ❖ archaeological
- ❖ natural
- ❖ educational

To identify specifically the ROVs will require interpretation of the proposed legislation

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

Now lets review Mojave Trails National Monument Proclamation ...

**NATIONAL
CONSERVATION
LANDS**

Identifying Resources, Objects, and Values

Review and identify objects in the specific proclamation for the National Monument?

- ❖ Identify specific “Objects”
- ❖ What are some potential broader themed ROVs ?
- ❖ Remember to state as:
 - complete thought;
 - measureable;
 - identifies or describes possible trends;
 - identifies or describes possible stressors.

Objects

CONSERVATION
LANDS**

Integrating ROVs into Resource Management Plan

How to incorporate Resources, Objects, and Values into a Resource Management Plan?

- ❖ Purpose and Need
- ❖ Chapter 2 Resources

Dominguez-Escalante National Conservation Area Resource Management Plan provides an example of incorporating Resources, Objects, and Values into the planning process.

Dominguez Escalante NCA, CO

**NATIONAL
CONSERVATION
LANDS**

Integrating ROVs into Resource Management Plan

Dominguez Escalante National Conservation Area
APPROVED RESOURCE MANAGEMENT PLAN

1. Resource Management Plan Decisions

1.1. Purpose of and Need for the RMP

The purpose of this RMP is to provide for long-term conservation and protection of the “unique and important values” of the D-E NCA that were identified in the area’s enabling legislation: the Omnibus Public Land Management Act of 2009, Public Law 111-11. These values include the “geological, cultural, archaeological, paleontological, natural, scientific, recreational, wilderness, wildlife, riparian, historical, educational, and scenic resources of the public lands, as well as the water resources of area streams, based on seasonally available flows, that are necessary to support aquatic, riparian, and terrestrial species and communities

**NATIONAL
CONSERVATION
LANDS**

Integrating ROVs into Resource Management Plan

Dominguez Escalante National Conservation Area
APPROVED RESOURCE MANAGEMENT PLAN

2.1. RESOURCES

2.1.1. Geological and Paleontological Resources

GPA-GOAL-01:2 Conserve and protect the D-E NCA's paleontological resources, unique geologic features, and examples of geologic processes.

GPA-OBJ-01: Maintain the unique geological and paleontological purposes of the D-E NCA by identifying, protecting and preserving fossil sites and unique geologic landforms.

https://eplanning.blm.gov/epl-front-office/projects/lup/33152/94911/114794/D-E_NCA_ROD-ARMP.pdf

**NATIONAL
CONSERVATION
LANDS**

Reporting Resources, Objects, and Values

How to report Resources, Objects, and Values

- ❖ Annual work plans should address inventorying and monitoring efforts
- ❖ Report accomplishments in the annual Manager's Report

**NATIONAL
CONSERVATION
LANDS**

Reporting Resources, Objects, and Values

Vegetation

Native plant communities in the NCA include creosote bursage scrub vegetation and blackbrush scrub. Rare plant surveys have identified a population of the BLM sensitive plant species yellow twotone beardtongue (*Penstemon bicolor* ssp. *Bicolor*).

Vegetation Status and Trend Table

Status of Resource, Object, or Value	Trend
Good	Stable

Vegetation Inventory, Assessment, Monitoring Table

Acres in Unit	Acres Inventoried	Acres Possessing Object	Acres Monitored in FY
196,877	13,500	36	13,500

**NATIONAL
CONSERVATION
LANDS**

Reporting Resources, Objects, and Values

Stressors Affecting Vegetation

The Botanist and Weeds Coordinator in the Southern Nevada District Office are working with the Nevada Department of Transportation to make sure that noxious weed species are treated along the highways running through Red Rock NCA, while simultaneously protecting *Penstemon bicolor* ssp. *bicolor*, which is a BLM sensitive species. These plants both grow along the roadsides, but NDOT will avoid areas where sensitive plants grow in order to avoid harming these species. BLM is also working with NDOT to mitigate for disturbance of this species' habitat due to road construction, which has led to extensive seed collection and reseeding post disturbance.

Notes Summary:

Audio: None

NAR:

"It is important to clearly understand which ROVs the BLM is charged with conserving, protecting, and restoring by the designating authority, regardless of whether the designation is carried out through legislation or a proclamation. In this exercise, you are the manager of a newly designated Canyons of the Ancients National Monument.""

Notes Summary:

Slide 18: 'Project Name: NM NCA Module 2 Interim Guidance

Screen Title: Identifying Resources, Objects & Values

Screen: 18/36

Graphic Info:

Navigation: When the learner drags a correct answer over to the "Objects" box, the answer should remain in the box. Wrong answers will not be allowed to "stick" in the box, they should "bounce" out of the box. Also, provide the learner with this response to wrong answers: "'Not quite. This is not an ROV.'"

DEV: CORRECT Answers

Remarkable cultural resources

agricultural fields

pit house dwellings

Wide variety of wildlife species

game birds

Peregrine falcon

Mesa Verde nightsnake

Geology

Notes Summary:

DEV: INCORRECT Answers
recreation
grazing permits and leases
basketmakers
oil and gas development
hunting and fishing
Review Comments:
Audio: None
NAR: none '
